## **DETAILED ACTION**

### ***Election/Restriction***

1. The examiner's acknowledge's applicant's election with traverse of in Paper No.3 and while not necessarily agreeing with applicant's arguments, the examiner hereby withdraws the previous election requirement and examine all pending claims.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3762

3. Claims 16-18, 21-27, 28-31, 34-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Gat USPN 5,954,663.

Gat teaches a network of fetal sensors for sensing multiple patients using a plurality of window pages (see fig 2) that allows a particular patient data to be selected by a command that may result in graphical data as seen in figure 2c. The commands allow for realtime display (see column 7 lines 53-59 and column 11 lines 19-25) as well as the ability to retrieve or playback past data (column 7 lines 28-40). The examiner considers the Gat computer connections to be a configurable network link since the displays are interlinked and configurable to various patients.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16-35 rejected under 35 U.S.C. 103(a) as being unpatentable over Gat USPN 5,954,663 in view of Brown USPN 6,381,577, Halpern et al USPN 5,687,717 or Dempsey et al USPN 6,057,758

Art Unit: 3762

While the examiner considers Gat to teach claims 16-18, 21-27, 28-31, 34-35 in terms of their plain and simple meaning, in the event that the claims are read more narrowly, to be limited to the internet, with a browser, the examiner considers the use of such to be obvious in view of the wealth of prior art. Brown teaches the advantages of providing patient monitoring system to enable multiuser capabilities and to provide feedback to healthcare industry. Halpern et al, likewise uses an internet environment (column 8 line 42) for fetal monitoring (column 11 54) and Dempsey et al as well. In lieu of that shown in the prior , the examiner considers it obvious to employ the Gat fetal monitoring system on an internet type connection since it was well known in the art to do so for the benefits expressed by Brown Halpren and Dempsey.

***Double Patenting***

6. Claims 16-35 are rejected under the judicially created doctrine of double patenting over claims 1-7 of U. S. Patent No. 6,350,237since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: As noted in applicant's response, the new claims 27-35 correspond to those of the patent claims which are patently indistinct from claims 16-27 in this application.

Art Unit: 3762

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
